

Setup Instructions: Eudora Light E-mail Client

1. Open Eudora Light.
2. Click on **Tools** and then **Options**, or **Special**, then **Settings**.
3. On the **Options** screen, for the **POP account**, enter pop3.psinet.com for a Remote Access account, and psimail.domain.com for a PSINet e-Mail account.
4. Also enter your **Real name**. Then click on the **Personal Info** tab.
5. Enter your **Return address** which will be username@psinet.com for a Remote Access account, and username@domain.com for a PSINet e-Mail account.
6. The **Dialup username** should be left blank. Click on the **Hosts** tab.
7. The **POP account** remains the same. The **SMTP** server, however, must be specified: smtp.psinet.com for a Remote Access account, and smtp.domain.com for a PSINet e-Mail account. Leave the Ph: and Finger: fields blank.
8. Click on **Checking Mail**.
9. It is important on this **Options** screen to check on **Save password** so that you don't have to enter it every time you check your mail. The other settings in the **Options** window are preference settings, which you should review and select based on your preferences.
