

Setup Instructions: Netscape Navigator 3.0 E-mail Client

1. Open Netscape Navigator 3.0.
2. Click on **Options**, then Mail and News Preferences.
3. Click on the tab at the top that says **Servers**.
4. In the **Outgoing Mail (SMTP) Server** field, enter smtp.psinet.com for a Remote Access account, or smtp.domain.com for a PSINet e-Mail account.
5. In the **Incoming Mail (POP3) Server** field, enter pop3.psinet.com for a Remote Access account, or psimail.domain.com for a PSINet e-Mail account.
6. The **POP3 User Name** is your login name, not your e-mail address.
7. If you have a Remote Access account, your news server is usenet.psinet.com. If you have a PSINet e-Mail account, your news server address will depend on your region: refer to our support Web pages to find the correct address.
8. Click on the **Identity** tab.
9. The information on this screen is fairly self-explanatory: your name, your e-mail address and your reply-to address, which is the same. Finally, enter your company, if applicable.
10. Then click **OK** and click on the small envelope in the bottom right-hand corner of the Netscape window, which should bring the mail program up and retrieve your mail.
