

## Configuring the MicroRouter 1220i for LAN-Dial

```

>en
#interface ethernet A
#set bridge off
#set ip on
#set ip address LAN.LAN.LAN.LAN
#set ip mask 255.255.255.0
#interface ethernet B
#set bridge off
#int bridge
#set bridge off
#set ip off
#edit chat script
    >append
    >send atdt PHONE.NUM
    >expect CONNECT
    >.
    >exit
#interface wan 0
#set wan mode off
#interface wan 1
#set wan connect mode dial out script
#set wan serial type async
#set wan serial baud 115200
#set wan connect dialing at
#set wan serial fcntl hw
#set wan connect timeout inactivity 10
#add ip route 0.0.0.0 0.0.0.0 1 1
#set ppp auth pap allow ACCT.ID PASSWORD
#set sys log on
4set sys log level 9
#set sys log aux
#save
    
```

### Key:

**LAN.LAN.LAN.LAN** = assigned router IP address.  
**PHONE.NUM** = phone number for POP.  
**ACCT.ID** = assigned account ID.  
**PASSWORD** = assigned account password.
